### About This Game

*Buried* is a playable, interactive story told through stunning photos, a haunting soundscape, and gripping text. You play the role of Roger Hastings, a logger working the forests with his crew. When he awakens to find his friends missing and no memory of what's happened, he begins searching, uncovering something that should have stayed hidden...

Make choices that affect the plot: how to approach danger, who to trust, and who lives or dies.

No waiting or pauses - play straight through or at your own pace through 5 intense chapters.

What's beneath the surface? Where is your crew? And what will your decisions reveal about you?

I open my eyes and the first thing I want to do is scream.

I'm flat on my back and everything seems to hurt.

The trees overhead look familiar...a clear night sky, almost beautiful, except for the fact that this means I've been out cold at least six hours.

But there's something wrong...I don't remember, something happened and...

My head...my God, my head hurts. And a ringing in my ears. Was there an accident?

An explosion, I think. I remember Dennis screaming..but after that...I can't remember...

i have played only half of the game and let me tell you if you don't mind reading on your own without a reader, with scary sounds this game legit crept the hell out of me while playing on a saturday night around 1:30 AM. Story of the game: You wake up in the wooded forest where everything and everyone vanished on your worksite, not knowing where you are and what happend to you. You have barely any phone charge and the only thing to do is to find your friends and maybe get out alive depending on your choices. Maybe the things you fear in the game will become a reality....(RECCOMENDED). 10/10 I recommend this game!

This game is kind of a "choose your own adventure game" in that you are given choices as you play and these choices determine the outcome of further storyline.

It's not action packed, but it sets a good mood and environment for it's plot. It's a great mysterious story that I haven't gotten too far into -- but I want to know more. It's gripped it.

This game is under \$5 and the quality of the story is worth that much. Multiple chapters to play (I think 5) and let your imagination run wild!

So instead of judging a book by its cover, I began reading. The story became very interesting and I wanted to read more. The concept of the reader and the characters having vague clues on what is going on, just aroused my curiosity. After Chapter 1 I was so enthralled in the story and I couldn't stop reading. The story may only be 5 Chapters long and have a very weird ending, however, it's just incredible! I'm not saying the ending was terrible, the ending was actually quite of a cliffhanger but left on a good note and I genuinely liked it. It opened up the possibility that top secret agencies are actually researching these kinds of things and makes me wonder. Now I might be getting too ahead of myself but, nonetheless, it was a great concept and I loved this story. For \$3, I don't think you can find a better book. Great job guys!. Absolutely amazing. Definitely a game if you like to read and are ready for about 3 hours of sci-fi, suspense, terror, and all around mind-boggling decision-making during crucial plot points. However, if you're not into reading and music/photos don't really create an effective ambiance for you, I'd suggest moving along. I'm very impressed with the detail that went into the writing and how much effort the developers clearly put into making this game. So congrats to them on a job well-done. I will definitely be recommending this one to all my friends! Worth more than \$3.00, in my opinion.. I purchased this because I love interactive story games. Let's keep this short and simple. It was good, enjoyed the story very much and the ending was quite satisfying. Well worth the \$3 however starting in chapter 3 the game would glitch and die on me and that got slightly worse with each chapter but it did save progress so it wasn't setting me back but just causing minor inconveniences.. It has been more than 1 year since I played this game, i just realized that i need to post a comment for this game.

Developing a text based adventure game has been one of my dreams and this game triggered that ambition in me. I owe this game that. Now i know what to do.

Cheers.

Lovecraft written better. It works in the fashion of the Choose Your Own Adventure books of my youth. A story of a simple logger who awakes after an incident. To tell more would be to spoil. It takes about 2 hours or so depending on your reading speed. The choices are generally the "go left" or "go right" and the story seems to follow a similar path more like branching paths that tie into the main narrative.

If you love the works of Lovecraft at his most sci-fi then Buried is for you. It's \$5. Buy it and play it. I'm going to play again and see what the different results are. So if you like story games this is a good time drinker.. Very Intense! The audio they paired with the game was well done, it had me looking over my shoulders from time to time. Bittersweet in some parts, outright insane in others, but it had a good amount of tense and creepy.. Beautiful game indeed.

+Very good story

+Atmospheric music

+Good art

If you like to read and you like to make your own paths in the story this is a game for you .. For \$3 this is a masterpiece. The story was suspenseful. The characters were well thought out, although towards the end some of them seemed to change rather drastically in a very short amount of time. I'm still curious about the other possibilities that you can get from this game, but I'm not sure I want to spend another 3.5 hours to play it all over again. I wish there was a feature where you could start from a specific chapter (which there may be, I haven't gone back to look yet) so I could just go to the parts where I made mistakes and correct them. The only other criticism I have about this game is that it is simply another game that more or less creates the illusion of choice. In some instances it doesn't really matter what you choose to do, the outcome will be the same, however, this game didn't do that badly when it came to meaningful choices, and I commend it for that. I approve.. This is a very simply made game: static image backgrounds, text and music. No amazing 3D graphics, dazzling explosions or killer AI enemies... What is amazing is the terrific, immersive story you are drawn into.

The tale begins with you waking up after some kind of accident in the woods. You try to find out what has happened and are gradually drawn into lethal mystery. All the elements are top-notch. Great characters. Creepy environments. Discoveries that are both baffling and horrific. And threats that are chilling and relentless.

During the story, you regularly make decisions that will affect the narrative. You may find yourself crushed by a choice which leads to an awful death. I found there were sufficient decisions to be made to keep you deeply involved without detracting from the game's biggest strength, which is the storytelling.

The writing is gripping from start to end. For me, it felt like being trapped in a truly sinister Stephen King story - it was that good.

Negatives? Other than a few typos near the end of the story (which didn't spoil the game), none at all.

Playtime: 3-4 hours.

Overall: 10/10. I'd love to play another game like this from the same production team!. It has been more than 1 year since I played this game, i just realized that i need to post a comment for this game.

Cheers.. Very cool story with so many different choices leading to so many different outcomes. Masterpiece. What an incredible story! The immersion, plot development and character building really made me love this game. Having to sit back and think about your choices really added to the whole experience. I will be replaying this game for sure... I may not be so nice the second go round.. As the name and screenshots would have you assume, Buried is an interactive story game where you play by choosing different dialogue options. The game is just reading the text on the screen with a pretty screenshot in the background. That is the dumbed down version of what you can expect.

The game will play about 3 hours or more give or take depending solely on how fast you read and can make tough decisions. Immediately the game throws you into the action making you choose the fate and well being of those around you as well as yourself. As of right now I have watched half of the game in a let's play by Markiplier

<https://www.youtube.com/watch?v=JZYwn4noWho>) and have also finished my own playthrough. The game is so immersive and tense that its like watching a movie that you at the same time are a part of. You feel remorse for your actions and sympathy for characters you never see or hear and that is only a part of the beauty of this game. You have to try it for yourself and you will quickly find out if you like it or not defintely by the 2 hour steam refunding point. Goodluck!

I recommend this game to anyone who is interested. One of my very few problems with the game is the ending felt just a little bit rushed or like it could have been just a little more satisfying in multiple ways. I like what it tried to do but fell flat and felt more like a lazy cop-out than an ending worthy of the game up to that point.. This contains everything i could ever ask for in a Choose your own adventure game.

Simply: I love it.

The story is original and it never lacks for excitement. I would recommend this game.
